

Electronics and automation giant [ABB India](#) announced that it has rebuilt and extended its smart power factory in Nelamangala, Bengaluru, in order to keep up with the rapid increase in demand for its products.

ABB India said in a statement that the smart facility uses advanced collaborative robotics technology, artificial intelligence (AI), and advanced digitalization technologies to provide a sophisticated, automated, and adaptable production that is ready for the future.

The facility, according to the statement, meets the rising demand for electricity in a variety of industries, including construction of commercial and residential structures, infrastructure, utilities, and renewable energy sources like solar and wind.
