

The Air Force Academy is a renowned organization that is dedicated to providing top-notch education and training to aspiring young individuals who wish to pursue a career in the Air Force. In line with its commitment to making a positive impact in the communities it operates in, the Academy is planning to take up a new sewage treatment plant in Dundigal, Quthbullapur, Medchal, Telangana. The project involves the establishment of a sewage treatment plant with a capacity of 800 KLD and is estimated to cost Rs.25 million. The project has received the consent from the state pollution control authorities, and as of February 2023, the Academy is actively working towards the implementation of this important project. This sewage treatment plant is expected to significantly improve the local environment and provide a cleaner, safer and more sustainable living environment for the local community.
