

In a major development, a new air separation unit is set to be established at the Hazira Steel Plant in Gujarat in collaboration with Inox Air Products. The unit is expected to support the production of steel at the plant and will be instrumental in boosting the country's steel production capacity.

The new facility is expected to be equipped with advanced technology and will utilize the latest methods for air separation. The partnership between the two companies is aimed at ensuring the production of high-quality steel at the Hazira Steel Plant and increasing the efficiency of the plant's operations.

The Hazira Steel Plant is one of the largest steel plants in the country, and the establishment of the air separation unit is expected to significantly boost its production capacity. The plant has been actively involved in the production of steel and has been contributing to the growth of the country's steel industry.

The collaboration between Inox Air Products and the Hazira Steel Plant is a significant step towards strengthening the country's steel production capacity. The use of advanced technology and the latest methods for air separation is expected to improve the overall quality of steel production and increase the efficiency of the plant's operations.

The development is also expected to have a positive impact on the country's economy and create new job opportunities in the region. The establishment of the air separation unit is expected to contribute to the growth of the steel industry in the country and improve its competitiveness in the global market.

The partnership between the two companies is expected to be a win-win situation for both parties and will be instrumental in strengthening the country's steel industry. The new air separation unit is expected to be operational soon, and it is expected to contribute significantly to the growth of the Hazira Steel Plant and the country's steel industry.

Air Separation Unit to be Set Up at Hazira Steel Plant in Partnership
