

A modern facility in Bengaluru has been officially opened by AMETEK India, a subsidiary of AMETEK Inc., to better serve its clients in India and around the world.

After beginning operations in 2009, AMETEK India continues to satisfy customer needs with its cutting-edge products and unique technological solutions. The facility is an expansion of AMETEK's innovation hub, which serves a variety of industries including oil & gas, aerospace & defence, automotive, food, pharmaceutical, and packaging, as well as high precision metrology.

Spectro, Taylor Hobson, Land, Atlas, Brookfield, Zygo, compliance test solutions, programmable power, Lloyd, Precitech TMC, and AMT are just a few of the AMETEK companies with new products on display in the facility's Centre of Excellence.

The centre will not only allow businesses to present their capabilities via in-person demonstrations of their products and solutions but will also accommodate service and calibration labs.

The new facility also houses a well-equipped 'Engineering Center of Excellence' with R&D laboratories that support the company's business units across its global network for design, development, and prototype testing activities.
