

The installation and activation of a new manufacturing line for acrylic dispersions in Dahej, India, by BASF SE was completed successfully in order to service the coatings, construction, adhesives, and paper industries for the South Asian markets. The capacity of the polymer dispersions that BASF began making in Dahej, India, would roughly triple with the addition of this additional production line.

One of the leading manufacturers and providers of acrylic and butadiene-containing dispersions in the Asia Pacific area is BASF. As a significant provider of polymer dispersions, we are committed to offering only top-notch products and supporting the expansion plans of our clients. The South Asian market is one of the subregions of the Asia Pacific region that is growing significantly.

Milind Joshi, Director, Dispersions South Asia at BASF informs, "Our customers are seeking for global partners like BASF that can bring innovation and knowledge with its broad footprint to help them differentiate in their markets".
