

Battery Smart, India's largest and fastest-growing electric vehicle (EV) battery-swapping network, has partnered with Zypp Electric, India's premier Shared Electric Mobility start-up. 2000 Zypp Electric two-wheelers will be linked onto Battery Smart's network as part of this agreement, giving drivers smooth access to 175+ Swap Stations throughout the Delhi NCR region. A 200-vehicle pilot programme is currently underway.

Zypp Electric can minimise its CAPEX while increasing operations thanks to Battery Smart's innovative battery-as-a-service approach. With no downtime, Zypp's drivers can save time and leverage a well-established network to replace batteries at any location, allowing them to be on the road for extended periods of time.
