

**Bodal Chemicals Limited** has successfully completed the technology upgradation of Rajpura Plant in Punjab.

Ankit Patel, Executive Director informs, “This technology upgradation is a notable achievement for the company as we will be able to serve incremental demand for Caustic Soda and reduce overall energy cost.”

He added: “Demand for this chemical has been healthy over the last few years, especially in home care, textile and paper industries and very few players were able to serve those industries that are based out in North India. This will lay the foundation for the company’s next phase of growth and will enhance our market position in the Chlor-alkali chemicals”.
