

Boeing India announced that by the end of 2023, it would open its new and second largest campus outside of its global headquarters in Virginia, at Aerospace Park in Devanahalli, near Kempegowda International Airport.

On Monday, January 30, the company announced that it had spent more than \$200 million to build the campus on 43 acres of land on the city's outskirts. The project was approved by the government of H.D. Kumaraswamy in September 2018.

According to Aarti Singh, Senior Director, IT and DA and CIO Boeing India, the new facility would house various labs, testing infrastructure, and R&D operations, while most engineers would continue to work from the Boeing India Engineering & Technology Centre at Bagmane Tech Park in Bengaluru.
