

An official said the Chhattisgarh government signed two Memorandums of Understanding (MoUs) for the establishment of a food irradiator plant and dung-based power plants, which will keep food and vegetables safe and well-preserved.

According to the official, the government will establish the first food irradiator plant in the government sector to keep food grains, vegetables, and small forest produce safe, fresh, and retain their quality for a longer period of time.

“For the operation of the food irradiator plant and technology transfer, the state’s Seed Corporation has inked an MoU with the Department of Atomic Energy’s Board of Radiation and Isotope Technology,” he said.
