

[Grew Energy Pvt Ltd](#), a business that manufactures solar components, was recently established by Chiripal Group under Chiripal Renewables. By doing this, the company has entered the renewable energy market and demonstrated its commitment to the goal of a sustainable future. This new business is committed to offering top-notch solar energy solutions for both domestic and foreign markets.

By 2070, the government wants to be net-zero. India now relies on fossil fuels to meet the majority of its energy demands. As a result, the government has promoted the use of solar energy through a number of programmes and incentives.

Vinay Thadani, Director, Grew Energy Pvt Ltd comments, “At GREW we believe that sustainable solutions are necessary for future development. What catapults GREW to soar high is the expert team with fifteen to twenty-six years of experience in sustainable solutions, the spirit of technovation, and a world-class infrastructural facility that brings together intricate engineering and functional design. Over the period of the next four years, the facility will catalyse a manufacturing capacity of 4 GW PV Modules, 3 GW PV cells, and an impressive 300 tons per day of tempered glass. Initially, the manufacturing will be equipped with its first two GW of fully automated unit in the state of Rajasthan, while the other manufacturing facilities will branch across India in a phased manner”
