

The new Crane Engineered Check Valves plant in Satara, Maharashtra, has officially opened. The facility satisfies strict quality and product approval standards and has in-house machining capabilities for all available size ranges. For valves up to 72, the facility enables internal high-pressure gas and cryogenic testing. Additionally, certified testing that details leak rates and provides a graphic representation of the testing cycle is available based on the precise temperature or pressure requirements of the customer.

About 100 employees who work directly at the new facility service a range of industries in the chemical processing, oil and gas, petrochemical, and energy sectors, including renewable energy, as well as other growing markets, such hydrogen generation.
