

Crane India has opened a new factory producing designed check valves in Satara, Maharashtra, . A wide variety of Noz-Chek and Duo-Chek valves in sizes up to 84 are produced in the facility using automated welding technology.

The facility satisfies strict quality and product approval standards and has in-house machining capabilities for all available size ranges.

Additionally, the facility provides in-house cryogenic and high-pressure gas testing for valves up to 72”.

Harijinaga, President, Crane India comments, “Our new engineered check valve factory reflects digital transformation trends and features a fully automated manufacturing process to ensure our products maintain the quality Crane is known for. Crane India has been an influential force in the country through our contributions and investments in local communities over the past thirty years”.
