

The first green hydrogen microgrid project will be installed in the Leh region for a significant hydropower firm in India by Unecops Technologies Ltd., a producer of green hydrogen and solar energy based in Delhi.

A green hydrogen-based fuel cell microgrid of 25kWe will be installed for a major hydro-power company's guest home at Power Station, Alchi, Leh, with assistance from Unecops Technologies Ltd.

This project will be the first of its kind because it will be constructed at a very high height of 3200 feet. This ground-breaking programme represents a significant advance for renewable energy.

The company will provide three years of operations & maintenance service that will ensure the smooth and uninterrupted operation of the microgrid, making it a sustainable and cost-effective solution for the major hydro-power company's guest house.
