

Dhanuka Agritech, an agrochemical company, invested 10 crore to establish a new research and development facility in Palwal, Haryana. The building, which is a part of a six-acre campus, will be accessible to farmers, researchers, and other agriculture industry participants. The business also offers farmers on-the-job training in fields.

The R&D centre will include a training facility as well as laboratories for organic synthesis, analysis, formulation, soil and water analysis, agriculture R&D, botanicals, bio-pesticides, bioassays, insect-rearing, and bioassays.

The facility is set up to conduct fundamental, applied, and adaptive research to address present and upcoming problems for the long-term sustainability of Indian agriculture.
