

In an attempt to dominate the EV charging industry as a first mover, ElectriVa, an electric vehicle charging provider, announced it will install one lakh charging sites across India in the next three years.

The vision is to have an ElectriVa charging point every 20 kilometers, said the company's founder Sumit Dhanuka. "We are going to install an electric charging point every three kms in Delhi and at all key locations. The same will be replicated across all metros," he said.

ElectriVa had recently bagged the contract for installing and operating 100 EV charging stations in Delhi and another 150 are in the pipeline.
