

In order to collaborate on technical drone and research operations for a two-year term, drone manufacturer Garuda Aerospace and the Indian Institute of Science (IISc) signed a memorandum of understanding (MoU) on Wednesday.

The Department of Aerospace Engineering will assist Garuda Aerospace and IISc in future activities, according to the corporation.

“The association is a step toward realising the company’s potential to provide developments of digital input processing packaging tools including diagnoses of crops, surveillance, and mapping of fields and lands. Our recently launched drone will be used for surveillance,” said Agnishwar Jayaprakash, Founder and CEO, Garuda Aerospace.
