

Several commercial aircraft engine components will continue to be produced and supplied by [Tata Advanced Systems Limited \(TASL\)](#) to GE Aerospace's global engine manufacturing facilities.

The production deal has been renewed, according to an announcement from TASL and GE Aerospace.

The multi-year, long-term contract, which is worth over \$1 billion (Rs 8,100 crore), is a sign of GE and TASL's expanding partnership in the aerospace sector.

The Tata Centre of Excellence (CoE) for Aero Engines in Hyderabad will produce the engine components.

The CoE was established in 2018 to manufacture CFM International (a 50-50 joint business between GE and Safran Aircraft Engines) LEAP engine components in India. It showcases world class manufacturing, special processes, and engineering capabilities in India.
