

GE Renewable Energy has announced the opening of a new renewable hybrids manufacturing plant in Vallam, near Chennai. There are 250 people working at the site, with 20 of them being women.

“As the industry and customers’ demand dispatchable renewable energy to navigate the energy transition, the need for hybrid systems is increasing exponentially.

This facility has been set up following the lean principles of reducing waste and improving productivity and is well suited to strengthen GE’s place in the hybrids space,” said Prakash Chandra, Renewable Hybrids CEO, GE Renewable Energy.
