

As part of its Advanced Product Quality Planning (APQP) process, which is a structured process that includes crucial tasks from concept approval through production and, in essence, aims to create a product quality plan with all vendors and suppliers for developing and manufacturing products that meet customer requirements, [Gensol Engineering Ltd.](#) has achieved a significant milestone in the manufacturing of electric vehicles.

The “Tooling Design Release,” which the company has been successful in achieving for its anticipated EV, is a crucial milestone of the APQP process.

The objective of this phase is finishing the product design, and to put this into perspective, the company has been working with its suppliers to manufacture all parts in accordance with the company’s designs.
