

Gensol Engineering Limited has received purchase orders from reputable clients for the development of solar power projects totaling approximately 55.8 MWp in the states of J&K, Gujarat, Punjab, Rajasthan, Tamil Nadu, and Telangana. Out of the seven transactions completed by Gensol, five are Balance of System (BoS) projects and two are fully turn-key EPC arrangements.

Similar to this, only four projects will be built on land; the remaining three will be built on top of the clients' factories.

The total value of these projects is Rs. 153,15,75,000.00 (Indian Rupees One Hundred and Fifty-Three Crore Fifteen Lakhs and Seventy-Five Thousand Only) exclusive of taxes.

It is worth noting that out of the seven (7) projects, four (4) clients have repeated their orders with Gensol, which is emblematic of the trust that the company has built with its clients through its delivery of high-quality solar assets.
