

Geofast Industries (India) is a leading player in the beverage industry, known for producing high-quality packaged drinking water and fruit juices. The company has now decided to expand its operations by setting up a new packaged drinking water project in S. Lingotam (V), Chotuppal (M), YadadriBhuvanagiri, Telangana. The project will have a production capacity of 150,000 liters of packaged drinking water per day, and 30,000 liters of TATA gluco plus (juice) per day. This project is expected to be a major milestone for Geofast Industries (India) as it will not only help in increasing the company's production capacity but also help in providing the local market with a reliable and safe source of packaged drinking water. The estimated cost of this project is Rs. 91 million, and the company has already received consent from the state pollution control authorities to establish the project. With this new project, Geofast Industries (India) is poised to take the lead in providing high-quality packaged drinking water and juices to the local market. The company's commitment to producing safe and healthy beverages for its customers makes it a trusted brand in the industry.
