

Godrej & Boyce announced that its Godrej MEP (Mechanical, Electrical, and Public Health Engineering) division has been granted an MEP contract for the Bangalore International Airport (BLR Airport) project worth Rs 107 crore.

According to the Godrej Group's flagship firm, the project would include a Multi-Model Transportation Hub (MMTH) that will be developed between Terminal 1 and Terminal 2 of the BLR airport and will encompass around nine lakh square feet.

Once Terminal 2 is operational, the MMTH will be able to meet the current and future needs of both people and luggage movement, it said. "The goal of this MMTH is to have closed parking with retail development at the ground level. With the creation of 75 kilometres of piping and 200 kilometres of cables, Godrej MEP will deliver the project in just under six months," the statement added.
