

Goldi Solar

As part of its goals for company expansion, [Goldi Solar](#), the most quality-conscious solar brand in India, revealed plans to invest over Rs 5,000 crore. In addition, it simultaneously announced HELOC® Plus, a range of high-efficiency, low-carbon module products using heterojunction technology.

With the ability to manufacture modules, cells, and raw materials, Goldi Solar wants to develop into an end-to-end, vertically integrated business.

As a result, it intends to start production at its Gujarati cell manufacturing facility.

It will then increase its capacity to 5GW. In addition, Goldi Solar intends to hire approximately 4,500 workers across a variety of functions, bringing its total workforce—including current employees—to over 5,500.

Commenting on the key significant developments, Captain Ishver Dholakiya – Managing Director of Goldi Solar, said, “to create employment at the grass roots level, Goldi Solar plans to hire 25% of the workforce from the local tribal regions adjoining its proposed manufacturing facility. To train the new recruits for a career in renewables, Goldi Solar will conduct three-month certification programmes at a skill development centre that it plans to open in collaboration with the NSDC (National Skill Development Council) in Navsari, Gujarat
