

At its new facility in Gujarat, [Gujarat Alkalies and Chemicals Ltd.](#) will begin producing hydrazine hydrate, a liquid industrial substance, a company executive announced on Saturday.

The majority of India's 17,000 tonnes per year of hydrazine hydrate, which is mostly utilised as a starting product in the agricultural, pharmaceutical, automotive, and recreational industries, is imported. According to Swaroop P., managing director of the company, the [GACL](#) facility "will be the first large-scale manufacture of hydrazine hydrate and will reduce the nation's import of the chemical by 60%."

The new facility cost \$49 million and will generate 10,000 tonnes of hydrazine hydrate yearly.
