

The foundation for a new Stannous Octoate and Stannous Neodecanoate manufacturing plant has been laid at the Dahej, India, location of Gulbrandsen, a multinational chemical manufacturing company that specialises in affordable and high-quality chemical solutions for a variety of applications.

Eric Smith, President, Gulbrandsen, did a traditional coconut breaking at the India site and interacted with the members of the team.

Smith said, “We are proud to announce the expansion of our facilities to better serve our customers and reach new markets. This investment in our infrastructure will ensure a reliable supply of our high-quality products and open new opportunities for us.”

Gulbrandsen is the world’s largest manufacturer and supplier of polyurethane tin catalysts from its site in Orangeburg, South Carolina and this new facility is expected to be operational in the fall of 2023 and will double the existing capacity.
