Hikvision, a video-focused IoT solution provider, has announced a new technology relationship with Irida Labs, a vision AI solution provider based in Europe, to integrate its IP cameras and HikCentral software with Irida Labs' PerCV.ai Industry 4.0 Package.

The connection enables manufacturing and logistics companies to manage warehouses and plants in real time using intelligent vision AI solutions.

The integration allows the PerCV.ai algorithm to run inside Hikvision DeepInView camera series for edge processing via the Hikvision Intelligent Security API (ISAPI) protocol and Embedded Open Platform Program (HEOP).
