

Hitachi Energy, a global technology leader advancing a sustainable energy future for all, has opened a new high-voltage direct current (HVDC) and power quality plant in Chennai. These innovative solutions are critical for transmission growth, particularly for renewables integration and electrical grid stability.

The new facility will produce advanced power electronics for HVDC Light, HVDC Classic, and STATCOM, as well as MACH control and protection systems, which are the brains behind our advanced transmission and power quality solutions.
