

[Navin Fluorine International Limited](#), a major subsidiary of the Padmanabh Mafatlal Group, has established a cooperation with Honeywell to manufacture the Solstice series of hydrofluoroolefins (HFO) in India.

By Q2-2022, the business plans to begin production at NFIL's Gujarat manufacturing facility. According to the company's regulatory application, this next-generation product portfolio has no ozone depletion potential and a global warming potential (GWP) of 1, allowing clients to reduce their carbon footprint while maintaining the quality of their end product.

These materials are used for a variety of things, including blowing agents for foam insulation and chiller refrigeration liquid.
