

The integrated Panipat refining and chemical complex, which processes crude oil at a rate of 15 million tonnes per year (tpy), is being expanded by Indian [Oil Corp. Ltd.](#) (IOCL) has [handed Larsen & Toubro Ltd.](#) (L&T) a contract to perform engineering, procurement, construction, and commissioning (EPCC) for a new unit that will be incorporated into the project.

As part of the contract for the Panipat refinery expansion (P-25) project, which includes a 2.5 million tpy residue hydrocracking unit outfitted with exclusive technology licenced from Axens Group, L&T's hydrocarbon-onshore business will provide EPCC services.

The contract's scope of work for [L&T](#) also includes upgrading the refinery's current vacuum residue plant for the manufacture of high-value products like diesel.

Axens will supply its H-Oil technology for the residue hydrocracker to enhance distillate yield of the upgraded vacuum residue unit.
