

The Gujarat refinery of [Indian Oil Corporation Limited](#) is increasing its petrochemical capacity (LuPech Project). The largest global EPC and turnkey project management firm in India, Nuberg EPC, revealed that it had been chosen by Indian Oil to build a sulphur recovery plant worth more than Rs 650 crore, which will include a sulphur recovery unit, a control room, and a substation for the sulphur block.

The top refiner and retailer of fuel in the nation is Indian Oil, a Government of India Enterprise. Within Indian Oil's current site in Vadodra, Gujarat, the Sulphur Recovery Plant is being constructed for the Petrochemical and Lube Integration Project.

[Nuberg EPC](#) shall be executing this project using the latest French technology to future proof Indian Oil's Environmental Sustainability and augmenting Sulphur production capability. The 1 x 400 TPD Sulphur Recovery Unit will enable Indian Oil to recover sulfur from Sour Gas, a by-product of the refinery. The Plant is expected to be ready for production in just 28 months. The company is taking up the project on LSTK basis including the technology.
