

NTT of Japan proposes to invest Rs 2,000 crore in three data centres at Kolkata's Bengal Silicon Valley Tech Hub.

The first building will go up in 12 to 15 months, according to Shekhar Sharma, chief executive officer of NTT Global Data Centers & Cloud Infrastructure India and NTT Communications India. "We want to develop three data centres here with a total capacity of 25MW IT load," he added.

At the NTT Data Center Campus' "bhoomi puja" in Silicon Valley, Sharma stated that the building symbolises the business' modest beginning for a significant milestone.

The campus on a 7.5-acre land would spread over 600,000 sq ft. The first data centre facility on the campus would be spread over 100,000 sqft and have a capacity of 9MW facility load and 6 MW IT load, Sharma informed.
