

Jio-BP and TVS Motor Company have agreed to investigate the establishment of a comprehensive public EV charging infrastructure for electric two-wheelers and three-wheelers in India, building on Jio-developing bp's network in this area.

Customers of TVS electric cars are likely to have access to Jio-extensive bp's charging network, which is also available to other vehicles, as part of this proposed agreement.

The cooperation seeks to create a normal AC charging network as well as a DC fast-charging network by using the strengths of both firms.

This is in line with Jio-bp and TVS' commitment to provide consumers with a large and dependable charging infrastructure.
