

Kabra Extrusiontechnik is a leading Indian company that specializes in providing innovative solutions for plastic extrusion machinery and turnkey extrusion lines. With a strong commitment to innovation and customer satisfaction, the company has a proven track record of delivering high-quality products and services to clients across various industries. The company's decision to set up a lithium-ion battery manufacturing plant in North India is a significant step towards the growing demand for clean energy solutions. Lithium-ion batteries are widely recognized as a crucial component in the transition to sustainable energy sources, and the new plant is expected to play a key role in supporting this shift. The new facility is designed to be a state-of-the-art, highly automated plant with a capacity of 0.75 GWh per year. The facility will be equipped with cutting-edge technology and advanced manufacturing processes to produce new-age lithium-ion battery packs and other auxiliary items.
