

KEC International, a member of the RPG Group, has received orders worth Rs 1,415 crore in India's civil and oil and gas pipeline industries.

"This has significantly enhanced our order book in the urban infra segment. With this order, we are currently executing seven metro/regional rapid transit system (RRTS) projects. The strategic order in defence further strengthens our portfolio diversification in the civil business.

We are particularly enthused by our first order in the oil and gas pipelines business, post the recent acquisition of Spur Infrastructure. These orders along with the orders announced earlier, reaffirm our confidence in achieving the targeted growth going forward," KEC International MD & CEO, Vimal Kejriwal said.

The company has received orders for construction of elevated viaduct along with 11 stations from Chennai Metro Rail (CMRL) in a joint venture, civil infra works in the defence segment from a defence entity, laying of oil and gas pipeline from Indian Oil Corporation (IOCL) through its wholly owned subsidiary, Spur Infrastructure.
