

International business conglomerate thyssenkrupp has announced the opening of its new Technology Centre India (TCI) site in Hinjawadi, Pune. The cutting-edge facility will promote technical advancement, influencing the future of engineering and manufacturing globally. Building capacities in a variety of technological fields, such as data science, application software, embedded systems, and cloud computing, is the major goal of the new institution. To the companies of thyssenkrupp, including steel, industrial components and systems, automotive components, plant engineering, and materials services, it will serve as an innovation hub and supply cutting-edge solutions. The facility has the potential to make India a global knowledge powerhouse for the company's digital excellence.

"As we continue to drive thyssenkrupp's global digitalisation and innovation efforts, we recognise the critical role that India will play in achieving our goals. With the large pool of highly skilled talent in Pune and its thriving IT ecosystem, TCI will accelerate the digital transformation at thyssenkrupp globally." Cetin Nazikkol, CEO, thyssenkrupp Asia Pacific Africa.
