

Leading energy and environmental solutions provider bags orders
worth Rs 271.50 crore | 1

Thermax Limited has completed an order for mechanical balance of plant (MBoP) work for the captive power plant (CPP) at their new oil-to-chemical (O2C) facility in the western portion of India for Rs. 271.50 crore from India's largest oil refinery in the private sector.

In order to support the growth of O2C and the construction of a mega plant, the proposed CPP is anticipated to fulfil the increased demand for electricity from on-going projects at the customer's premises.

The customer has given Thermax, which has completed more than 150 EPC projects in the industry, the go-ahead to complete the MBoP work, which entails engineering, procurement/supply, construction, and civil works. The project is anticipated to be finished in 16 months.

Thermax is one of the few companies in the world that offers integrated, innovative solutions in the areas of heating, cooling, power, water and waste management, air pollution control, and chemicals. It has manufacturing facilities in India, Europe, and Southeast Asia.
