

developing technology sectors for growth and sustainability.

According to BHEL, the corporation seeks to diversify into developing technology markets while concurrently increasing its proportion of non-coal sectors. This vision is consistent with the potential commercial play in the hydrogen economy value chain, and BHEL has begun its efforts to realise it.

The business plans to hire a consulting firm with a solid track record and the required knowledge for the project's scope, which includes developing a strategy and roadmap, suggesting potential partners, and offering business support for the manufacture of electrolyzers and the green hydrogen value chain
