

L&T Construction has bagged a contract for its water & effluent treatment business to construct and commission water supply schemes for various towns in Tanzania.

“The aggregate scope of work comprises design & construction of raw water intake systems, storage tanks, water treatment plants of a total capacity of 71 MLD, 5 clear water reservoirs, pumping stations, 263 km of pipeline and associated electromechanical works,” the company said.

The EXIM Bank of India is funding the project. The ‘significant’ deal is worth between Rs 1,000 and Rs 2,500 crore, according to the business.

In addition, the Uttar Pradesh State Water & Sanitation Mission has placed add-on domestic orders with the company to undertake different rural water supply projects under the Jal Jeevan Mission to offer Functional House Tap Connections (FHTC) in the state.
