

As part of the development of its diagnostics network, multinational pharmaceutical company Lupin has opened a new Regional Reference Laboratory in Bengaluru, Karnataka.

With state-of-the-art technology and a staff of highly skilled clinical professionals, the new laboratory will offer patients and consumers in Bengaluru and surrounding cities convenient, inexpensive, and preventive healthcare services.

The pharmaceutical company's current network of 25 laboratories and more than 410 collection centres across India is supplemented by the Regional Reference Laboratory. It provides a wide variety of diagnostic services, including routine biochemistry, molecular diagnostics, cytogenetics, flow cytometry, microbiology, serology, haematology, and others. Lupin Diagnostics uses automation and simplified procedures to give extremely accurate test results, empowering patients to choose the best course of treatment.
