

Leading textile company Mahalakshmi Spintex is embarking on an exciting expansion project in Village Katha, Baddi, Solan, Himachal Pradesh. With a focus on enhancing their polyester staple fiber manufacturing capabilities, the project aims to meet the increasing demand for this versatile material in the textile industry.

Polyester staple fiber is widely used in various textile applications, including clothing, home furnishings, and industrial textiles. Recognizing the market's need for high-quality polyester staple fiber, Mahalakshmi Spintex is investing a substantial amount of Rs. 199.696 million to expand its production capacity to 24,000 metric tonnes per annum (MTPA).

The company's commitment to sustainable manufacturing practices is evident through its timely approval from the state pollution control authorities. This consent ensures compliance with environmental regulations and showcases Mahalakshmi Spintex's responsible approach towards minimizing its impact on the environment.

By undertaking this expansion project, Mahalakshmi Spintex aims to meet customer demands, capitalize on growth opportunities, and solidify its position as a leading manufacturer in the industry. The strategic location of Village Katha in Himachal Pradesh provides favorable conditions for the project's success, including access to resources and logistical advantages.
