

The Murugappa group company Coromandel International Limited presented Nano DAP, a fertiliser based on nanotechnology that was created by its R&D facility located at IIT Bombay. “To determine the product’s efficacy, we collaborated with a few agricultural universities and conducted about 700 field trials. The Department of Fertilisers gave it regulatory authorization, according to a company executive who released a statement.

To establish efficacy of the product, conducted 700 field trials and has partnered with leading agricultural universities, the company said in a release.

Earlier in March, Nano DAP received regulatory clearance from the Department of fertilizers, establishing Coromandel as the pioneer in adopting nano technology in Phosphate fertilizer space.
