

DOMO Chemicals, a leader in engineered materials around the world, celebrated the opening of a brand-new compounding line at its Indian site in Mahape, Navi Mumbai.

The new line demonstrates DOMO Chemicals' dedication to progress and development in India's engineered materials market.

DOMO Chemicals has seen exceptional double-digit growth in its total Asian operations and is consequently increasing its capacity throughout Asia, driven by strong demand for its polyamide-based solutions across the automotive, electrical and electronics, consumer and industrial products industries.

"This new line is another milestone in our commitment to growth and innovation in the Asia region. With a gradual total capacity of eight kilo tons of high-quality engineered materials based on polyamide, our state-of-the-art factory is now equipped with the latest technology to serve our customers in India. It is fantastic that we were able to celebrate this milestone in the presence of some of our key customers," said Fabrizio Cochi, General Manager, Asia.

DOMO Chemicals has been active in Navi Mumbai since 2016. Its technical center is equipped with advanced facilities for the development of new solutions for the Indian market.

These include a focus on metal replacement and light-weighting solutions, electrically friendly and flame-retardant materials for e-mobility, food and water contact grades targeting the home appliance market, as well as solutions for automotive cooling.
