

NCRTC has completed the construction of the Jangpura Regional Rapid Transit System (RRTS) station underpass.

According to the National Capital Region Transport Corporation (NCRTC), the underpass has four lanes and runs beneath Mathura Road, allowing all types of vehicles to get to the Jangpura RRTS station.

This will also allow access to the RRTS network's train stabling and maintenance yard, which is being built for all three routes. Mathura Road in South Delhi connects Jangpura RRTS station, allowing for easy access to the station.

It added that the 17-kilometer priority portion between Sahibabad and Duhai will be completed by 2023, while the entire corridor from Sarai Kale Khan to Meerut will be completed by 2025.
