In order to become the first greenfield digital airport in the nation, the future Noida International Airport (NIA) near Jewar has chosen ICAD Holding as its Master System Integrator (MSI) consultant. According to the DigiYatra strategy of the central government, paperless processing will be implemented at all checkpoints as part of the airport's digital objectives.

According to a statement from Yamuna International Airport Private Limited (YIAPL), ICAD will help the facility with the systems integration design, integration programme management, and integration of ICT and Airport Systems as part of its mission.

The company, which specialises in the design, installation, integration, and maintenance of ICT systems needed to build up a contemporary, digital airport, will also take the lead in implementing and integrating the primary airport systems, it was announced.
