

The famous 250 TPD chlor-alkali plant project in Karaikal, Puducherry, India, has been awarded to Nuberg EPC.

The project is owned by [Chemfab Alkalies Limited](#), one of India's top chemical producers. This would be the first greenfield Caustic Soda project that Nuberg EPC delivers in India.

This project will be carried out by Nuberg EPC using the most recent bi-polar membrane-based electrolysis system technology. Technology of Bipolar Membrane Cells The electrolyser is extensively utilised, safe for the environment, and constantly evolving. With this, the plant will only require a minimal maintenance area and can easily be adapted to the newest advancements in the future.

1. K. Tyagi, MD, Nuberg EPC comments, "This project serves as a prime example of the successful combination of Nuberg EPC's global project execution expertise and local knowledge to offer a complete Engineering, Procurement, and Construction Management. We are thankful to [Chemfab Alkalies Limited](#) for entrusting this EPCM project to our engineering capabilities and EPC services and solutions."
