

Nupur Recyclers announced that, in collaboration with EVI Technologies, it wants to establish approximately 200 charging points and numerous battery swapping stations in the domestic EV arena.

The company claimed in a release that the installation of these ubiquitous charging outlets has already begun in Dwarka, South West Delhi, and would soon be spread to other regions in Delhi-NCR.

By the end of the current fiscal year, the company hopes to have installed charging stations as well as battery switching facilities in other major cities.
