

Parakh Agro Industries plans to expand its plastic granules manufacturing capacity by setting up a new project in Bhandgaon, Daund, Pune, Maharashtra. The project's estimated cost is Rs.76.2 million, and it aims to increase the production capacity of plastic granules to 140 MT/M. As of February 2023, the company has received consent from the state pollution control authorities to establish the project, and it is expected to start soon. Parakh Agro Industries is an Indian company that specializes in plastic granules manufacturing. Their manufacturing process involves using the latest technology and adhering to strict quality standards to produce consistent and reliable products. With this new project, the company aims to meet the growing demand for plastic granules and strengthen its position in the market.
