

Polymatech commences production and sales of Made In India modules and opto-semiconductors | 1

Indian company [Polymatech](#) has started producing and selling memory modules and opto-semiconductors that are created in India.

The first and foremost semiconductor chip maker in India, powered by Japanese technology, has started producing memory modules and opto-semiconductors, which are utilised in lighting, medicinal, and food sanitization applications.

The company presently manufactures 400,000 chips each day at its primary production facility in Kancheepuram, Tamil Nadu, and these chips are already available for purchase. The Chennai- based business aspires to achieve its maximum daily capacity of 1 million during the upcoming few months (300 mn chips per annum).
