

The establishment of manufacturing facilities for a hydrogen hub in Andhra Pradesh has already started thanks to the power company NTPC.

The facility will enable equipment production, green hydrogen production, and export in addition to green ammonia.

For the advancement of a hydrogen hub near Vishakhapatnam, the state-owned enterprise

and the government of Andhra Pradesh have signed a non-binding Memorandum of Understanding.

Massive investments are being made by NTPC in energy storage and hydrogen technologies. In Andhra Pradesh, development on the hydrogen hub has recently begun.

A storage tender for 9000 MWh has also been launched.

NTPC has an operational renewable energy capacity of 3.2 GW and the overall capacity under execution has surpassed 20GW with various agreements arranged.
