

Eaton, an intelligent power management business, officially opened Puducherry's upgraded electrical plant.

The facility hopes to increase infrastructure while doubling the capacity of its medium voltage assembly lines with this expansion.

The new building is an astounding 40,000 square feet in size and is set up with cutting-edge production lines to make MCCBs (Moulded Case Circuit Breakers) and ACBs (Air Circuit Breakers) to effectively service the electrical industry.

Syed Sajjadh Ali, MD, India, electrical sector, said, "The expansion marks a major milestone in Eaton's continued growth in India focused on strategic markets and electrical segments. This not only demonstrates Eaton's leadership position in the industry but also showcases our commitment to the 'Make in India' initiative, operational excellence, and our relentless pursuit of enlarging our manufacturing footprint to meet evolving demands."
